

**EXHIBIT B
CONNECTION FEE FORMULAS**

MAIN LINE CONNECTIONS:

2016 - 2017

Equivalent Dwelling Unit

\$5,725.00

The equivalent dwelling unit fee applies to both residential and non-residential dwellings. Non-residential EDU's are based on the size of water meter service.

ASSESSMENTS FOR IMPROVEMENT DISTRICTS:

When lot sizes vary significantly within an improvement District, the methods or means of determining the assessment for each connection will be established at the formation of the improvement district. For a period not to exceed five (5) years after construction and acceptance, a percentage for all future main line connections within an improvement district will be refunded to the property owners. The amount each property owner will receive will be determined by the same method that assessments are determined.

DEVELOPER'S CONNECTION FEE FORMULA

The developer's connection fee will be the same as individual main line connection fees.
